

Introducing louvolite visage blinds

bringing luxury to the home

Visage is made up of two layers of soft fabric connected by horizontal sheer vanes that gently filter sunlight whilst maintaining different levels of privacy and UV protection as the blind is raised or lowered.

The blind can be raised to give an outside view, it can be lowered with the sheer vanes aligned to control the light and retain a view with some privacy during the day, or it can be fully closed for total privacy in the evening.

Visage blinds can also be motorised with Louvolite One Touch™ battery operated motors, enabling the adjustment of privacy levels and the filtering of daylight more conveniently at the touch of a button, enabling the adjustment of privacy levels and the filtering of daylight more conveniently at the touch of a button.
